

Forest and Nature-Inspired Green and Teal Palette

Inspired by green/teal being my favorite color, and wanting to go for a peaceful vibe

DM Serif and Inter Typography

I aimed for the professional style that also transmitted comfort and modernity. Similar to Times New Roman, DM Serif conveys seriousness but in a more approachable way. Inter was a body font option that tied in the whole vibe.

The screenshot shows the Font Squirrel website featuring the Inter font. At the top, the word "Inter" is displayed in a large, bold, black font. Below it, smaller text reads "RASMUS ANDERSSON" and "Neo Grotesque | Geometric | Humanist". There are buttons for "PREVIEW TEXT", "SIZE 48", and "Open in Figma". A text input field contains the sentence "The quick brown fox jumps over the lazy dog".

Whereas disregard and contempt for human rights have resulted

The image displays four different websites illustrating the use of DM Serif and Inter fonts:

- BOLT**: A beauty e-commerce platform. The main headline "Shockingly simple checkout" is in a bold, sans-serif font (likely DM Serif). The background features a woman wearing pink sunglasses.
- Fletcher**: A professional web design agency. The headline "Websites That Mean Business" is in a bold, sans-serif font. It includes logos for Reed Award, Google, and Yelp, along with three circular icons.
- HITT**: A construction company. The headline "Trust built through every experience" is in a bold, sans-serif font. The background is a dark image of a building under construction with a crane.
- Alexandre Cirica**: A personal website. The headline "Your Struggle. Our Mission." is in a bold, sans-serif font. It includes a photo of a woman and a man working at a desk.
